

Lacon - Sparland Fire Protection District

Dec 13, 2022 · 🌐

On Monday, December 12, we had a great opportunity to train on aircraft's. Chris Collins, manager at Mt Vernon Airport, presented a fantastic class. The class covered a variety of topics related to small planes and helicopters. Chris brought a demo fuselage for us to see. The plane fuselage added another visual layer to the training by helping understanding how a plane is built. All departments in attendance, even those without an airport gained knowledge from this class. An aircraft could make an emergency landing anywhere necessary.

Thank you, Chris, for coming out and sharing your knowledge of planes.

Special thanks to Marshall Co. Airport manager Barry Logan for putting us in contact with Chris.

Also, thanks to the departments that came.

Giles County Fire & Rescue

12h · 🌐

Members from **Giles County Fire & Rescue**, **Giles County Office of Emergency Management** and **Giles County EMS** joined our southern neighbors at **Ardmore Fire & Rescue** and **Alabama Fire College** this weekend for a multitude of training opportunities. Our extrication instructors taught basic extrication. Several students attend basic aircraft rescue/firefighting, rotary wing safety, and an ISO update.
